

M082 8" Rugged Industrial Tablet

Product Brief Introduction

Vantron M082 8" high-performance rugged industrial tablet is designed for industrial applications, especially in healthcare, plant walkdown, law enforcement patrol, and prison automation. The device is Android-based, powered by Rockchip multi-core processor with an 8-inch capacitive touch screen to offer excellent human-machine interaction experience.

M082 offers flexible specification options, excellent cost performance, and out-performing power management system. It is fully rugged to resist dust, water and drop, protecting the screen from damage in extreme conditions. It features fingerprint recognition for enhanced device security. The large-capacity battery is more than enough to get through a day of work. Better yet, it supports PD and wireless charging to ensure the device holder misses nothing in the hectic schedule.

Since 2002 established by two Silicon Valley entrepreneurs, Vantron Technology has been a pioneer in connected IoT devices and IoT platform solutions. Today, Vantron is serving customers all over the world, including many Global Fortune 500 companies. The product lines cover intelligent edge hardware, IoT communication devices, industrial displays and the cloud-based BlueSphere device management platform.

Vantron's intelligent display systems are comprised of industrial tablets, touchscreen monitors and all-in-one panel PCs that deliver enhanced device performance and exceptional human-machine interactive experience. The industrial tablets are powered by industry-leading brands such as Rockchip, NXP, MediaTek, and Intel. The touchscreen monitors offer flexible installation options to cater to various application scenarios. The all-in-one panel PCs offer an overall solution that integrates the touchscreen monitor, display, processor, and operating system. Moreover, the displays are built to excel in harsh environments thanks to advanced features like waterproofing, dustproofing, and shatter resistance.
