# M081 8" Rugged Industrial Tablet

### **Product Brief**

Vantron M081 high-performance rugged industrial tablet was designed for industrial applications, especially in healthcare, plant walkdown, law enforcement patrol, and prison automation. The device is Android-based, powered by Rockchip multi-core processor with an 8-inch capacitive touchscreen to offer excellent human-machine interaction experience.

While featuring flexible specification options, excellent cost performance, and out-performing power management system, it is fully rugged for water, dust and vibration resistance so as to protect the screen from damage in extreme conditions. It provides different wireless accesses for communication in a safe and secure manner. The large-capacity battery is more than enough to get through a day of work. Better yet, it supports wireless charging to ensure the device holder misses nothing in the hectic schedule.

Since its establishment in 2002 by two Silicon Valley entrepreneurs, Vantron Technology has been at the forefront of the connected IoT devices and IoT platform solutions. Today, Vantron boasts a global customer base that includes several Fortune 500 companies. Its product lines cover edge intelligent hardware, IoT communication devices, industrial displays and BlueSphere cloud device management platform.

Vantron's intelligent display systems are comprised of industrial tablets, touchscreen monitors and all-in-one panel PCs that deliver enhanced device performance and exceptional human-machine interactive experience. The industrial tablets are powered by industry-leading brands such as Rockchip, NXP, MediaTek, and Intel. The touchscreen monitors offer flexible installation options to cater to various application scenarios. The all-in-one panel PCs offer an overall solution that integrates the touchscreen monitor, display, processor, and operating system. Moreover, the displays are built to excel in harsh environments thanks to advanced features like waterproofing, dustproofing, and shatter resistance.
