

## M10 Series 10" General-purpose Industrial Tablets

### Product Brief

Vantron M10 series 10" general-purpose industrial tablets are powered by Rockchip multi-core processor with a 10-inch capacitive touchscreen to offer excellent human-machine interactive experience. This series supports cloud connectivity to Vantron BlueSphere device management platform for centralized management. The devices feature flexible specification options, large battery capacity, and out-performing power management system to meet different requirements for application in retail businesses, multi-media education, transportation, laboratories, and libraries.

Models available under this series are M10 Lite and M10 Pro. M10 Lite is a compact edition which retains the most basic features of industrial tablets and provides a low-cost solution for clients with performance guarantee. While M10 Pro is an advanced edition that enhances CPU performance and upgrades certain specifications. Moreover, it is superior in functions such as 4G, NFC, larger battery capacity and LED indicators to respond to the needs of more industrial scenarios in a more flexible manner.

Since its establishment in 2002 by two Silicon Valley entrepreneurs, Vantron Technology has been at the forefront of the connected IoT devices and IoT platform solutions. Today, Vantron boasts a global customer base that includes several Fortune 500 companies. Its product lines cover edge intelligent hardware, IoT communication devices, industrial displays and BlueSphere cloud device management platform.

Vantron's intelligent display systems are comprised of industrial tablets, touchscreen monitors and all-in-one panel PCs that deliver enhanced device performance and exceptional human-machine interactive experience. The industrial tablets are powered by industry-leading brands such as Rockchip, NXP, MediaTek, and Intel. The touchscreen monitors offer flexible installation options to cater to various application scenarios. The all-in-one panel PCs offer an overall solution that integrates the touchscreen monitor, display, processor, and operating system. Moreover, the displays are built to excel in harsh environments thanks to advanced features like waterproofing, dustproofing, and shatter resistance.
